

RAMKUMAR R

Full Stack Developer | React, Node.js, TypeScript, PostgreSQL

Bengaluru, Karnataka, India | +91 63796 45118 | ram232488@gmail.com | <https://www.linkedin.com/in/ramkumar-r-052b92179>

PROFESSIONAL SUMMARY

Full Stack Developer with 3+ years of experience designing and shipping production web applications across React/Next.js frontends and Node.js/Express.js backends. Proven record of measurable performance impact: cut API response times 40% by re-architecting PostgreSQL schemas and indexes, reduced database load with Redis caching under concurrent traffic, and cut frontend build times 50%+ by migrating a legacy build system to Vite. Skilled in REST API design, relational and NoSQL databases, Git-based collaboration, and Agile delivery. Quick to ramp up on unfamiliar codebases and comfortable owning features end to end, from schema design through UI implementation.

CORE SKILLS

Languages: TypeScript, JavaScript (ES6+), SQL, Python, HTML5, CSS3

Frontend: React 18, Next.js, React Hooks, Redux/RTK Query, Component Architecture, Responsive Design, Three.js

Backend: Node.js, Express.js, REST API Design, NLP/LLM Integration, Microservices

Databases: PostgreSQL (schema design, indexing, query optimization, stored procedures, FDW), MongoDB, Redis

DevOps & Tools: Git, GitHub Actions, GitLab CI/CD, AWS S3, Vite, Webpack, Agile/Scrum

Practices: Code Review, Unit Testing, Edge-Case Analysis, Technical Mentoring, Cross-Functional Collaboration

PROFESSIONAL EXPERIENCE

Full Stack Developer — AlMukarramah Consulting Services

Feb 2026 – Jul 2026

Bengaluru, India

- Developed full-stack features for Trade57.ai, a live B2B trading platform, using React 18 and Vite on the frontend with Node.js/Express.js REST APIs on the backend, increasing system throughput by 30%.
- Re-architected PostgreSQL schemas by redesigning indexes and eliminating redundant joins, cutting average API response time by 40%.
- Implemented Redis caching across high-traffic endpoints, reducing database query load and improving scalability during concurrent user spikes.
- Built bulk-upload and RFQ automation scripts with rate limiting and retry logic to reliably process large data payloads.
- Integrated PostgreSQL Foreign Data Wrapper (FDW) to enable cross-database queries across distributed instances without data duplication.
- Migrated the frontend build pipeline to Vite, reducing build time by over 50% and improving developer hot-reload speed.
- Refactored legacy modules and reviewed pull requests to improve separation of concerns, reducing bug surface area and improving long-term maintainability.

Software Development Engineer — Diatoz

Aug 2023 – Feb 2026

Bengaluru, India

- Delivered React and Next.js features across 5+ client projects, building shared component libraries that cut per-project development time by 25%.
- Owned REST API integration between React frontends and Node.js/Express.js/MongoDB backends across multiple concurrent client systems.
- Built a custom AI chatbot for IFQM using Node.js and NLP integration, automating user support and reducing manual query handling.
- Built AI agent tooling (SDE, PRD, and ARD document generators) for an Amazon-facing proof of concept, integrating LLM APIs to automate engineering and product documentation workflows.
- Engineered an interactive 3D product configurator for Barry Callebaut using Three.js and React, enabling real-time in-browser visualization (proof of concept).
- Mentored 3 interns through structured code reviews and workflows, improving overall team delivery consistency.

Software Development Intern — Diatoz

May 2023 – Aug 2023

Bengaluru, India

- Built responsive React and Next.js UI components for a recruitment platform, contributing to 2 production feature releases.
- Participated in Agile sprints, code reviews, and daily standups, building a strong foundation in professional software delivery.

EDUCATION

BE, Electronics and Communication Engineering — Karpagam Academy of Higher Education, Coimbatore, India (Apr 2018 – May 2022)

CERTIFICATIONS

C Programming Language — Carrier Vision Academy (Jun 2022 – Sep 2022)
